

To Whom it may concern: I was so relieved to hear about the defeat of the Tauzin-Dingle bill in the house. Now, there is another measure coming up before the senate sponsored by Mr. Tauzin's compatriot, John Breaux (D-LA), and Don Nickels (R-OK). The Broadband Regulatory Parity Act of 2002 is another brazen attempt to destroy parity in the telecommunications industry. It is aimed at empowering the Bell companies and driving competitive service providers out of business. Please DO NOT lay waste to all the great work being done, by all the competitive companies, in the technology sector today! Only through proper regulatory intervention can we keep competition alive and technology moving forward. Mr. Powell, I know you'll do the right thing. Thank you.
